

FUREX[®]
Extinguishing Efficiency
Made in Germany • Most Effective Fire Extinguishants

Continuous Improvement, Assured Quality

Furex stands for high quality fire extinguishants, maximum extinguishing efficiency and exceptional service. After establishing the *Speziallöschpulver Furex ABC* in May 1958, Furex evolved to a global brand. Furex continuously benchmarks when it comes to *development* and *innovation* ensuring *quality, continuity* and *perfection*. Furex is a cost-effective and crisis-proof product that provides customers' fire-fighting devices with maximum *extinguishing efficiency*.

Innovation in safety

In 2008, *Furex ABC Spezial* with 21.5% MAP (monoammonium phosphate) was approved and given a *combined 43A / 233B* rating for the 6 kg fire extinguisher. *Our in-house research and development capabilities* enabled us to achieve a further reduction of the extinguishing active substance (MAP) accompanied by a simultaneous optimization of the certified extinguishing efficiency. Since 2011, *Furex ABC Genius* with 11% MAP (monoammonium phosphate) and a combined *55A / 233B* rating for a 6 kg fire extinguisher has been the *most efficient extinguishing powder of its class worldwide*.

Safety Solutions for All Purposes

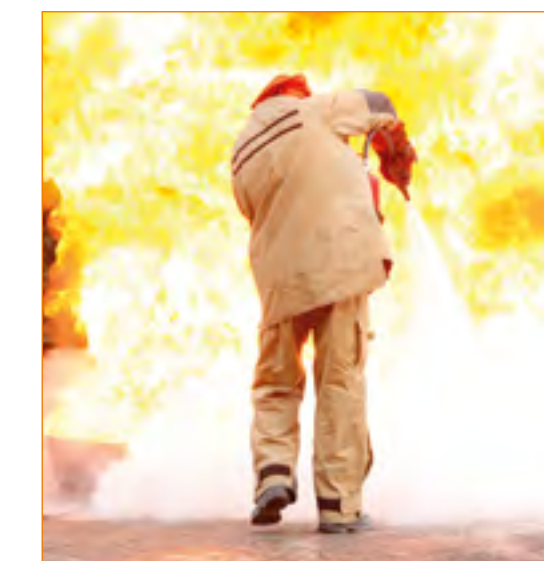

Our *wide product range* in combination with the *services* we provide allows you to purchase for your specific needs in our *one-stop Furex shop*.

Fire Extinguishing Powders

For the manufacturing of all our fire extinguishing powders we source high quality raw materials and offer following advantages

- EN 615 certified
- For all fire classes ABC, BC and D
- Highest extinguishing efficiency within each class

Liquid Fire Extinguishing Agents

Our liquid agents are individually modified liquid solutions of the highest Furex quality, assuring

- Ready-mixed Solutions
- Additives for Water Extinguishers
- Environmentally friendly solutions
- Anticorrosive solutions

Foam Concentrates

We continuously extend our product portfolio in response to market and customer demand. One of our latest approved safety solutions since 2011 are *AFFF foam concentrates*. This foam solution assures

- AFFF (film forming)
- EN 1568-3 (low-expansion foam)
- ICAO Performance level: B (table 8-1)

Service, Efficiency & Know-how

With approximately 60 years' *experience* in fire-fighting agents, Caldic is offering its customers unique *services* in connection with the *development* and *introduction* of their new products.

In addition to individual modifications to our products, we offer *consultancy services* and the *assistance* of our *experienced laboratory staff* during all required approval processes.

More services for you and your products

- Assistance during the optimization of the fire extinguishers / fire-fighting installations
- Individual customizable products
- Active assistance during the approval process

Contact us and we will work with you to develop a concept for having your device *officially approved* for use with our extinguishing agents.

We ensure you a mutual and lasting success.
